Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: the amendment proposes that cyclodextrln is added to water-based system prior to addition of said monomer raises new issue and requires new consideration and/or search.

Continuation of 5. does NOT place the application in condition for allowance because Applicants' argument is based on the difference the order of adding cyclodextrin, such Applicants argue that in EP'675a complex of cyclodextrin and monomer is formed and this complex is then combined with initiator. This limitation is present in the proposed amendment that has not been entered.
